

Wholesale Energy Purchasing has become easier and more transparent with Mint Energy's Power Select solution.

Power Select makes it easier to track purchasing electricity by displaying the wholesale rate and retail adder separately. A fixed Retail Adder allows you to forecast non-energy costs for the duration of your term while monitoring the wholesale market to see when would be the best time to lock in your energy.

### Power Select Benefits

- Purchasing wholesale energy without premiums will give you a clearer picture of what the actual cost of energy is on an hourly basis, and enables you to make decisions in the future to lock in at a favorable rate.
- You will be able to choose in future months whether to lock in a portion of your usage or not with the Power Select Program. Don't settle for having only one option to choose from, with this Program you will immediately begin purchasing on the wholesale market and will be able to choose a strategy to lock in energy savings in the future.
